TOOTH WHITENING

ONLY A DENTAL PROFESSIONAL CAN PROVIDE TOOTH WHITENING

Tooth whitening is a safe way to achieve a bright and younger looking smile. It is minimally invasive to your teeth and can be a great way to boost your confidence.

Whitening can be carried out in the dental surgery, at home or a combination of both.

Results vary from person to person but you will see a difference relatively quickly and it is a very straight forward procedure to do.

To whiten in the surgery you can relax for an hour or so whilst the whitening gel works its magic.

To whiten at home you will be given trays that fit specifically your mouth and will be able to take control of how much whitening you would like to do. The dentist will ask you to come back in for a two week review to see the results.
